

Calling all Nurses, AHPs and Midwives (plus)* from **ethnic minorities** or **underrepresented professions** or **settings in research**

Do you aspire to combine your clinical job with research?

If so, this fully funded Clinical Academic Mentorship and Leadership Programme may be for you

Research which is not inclusive doesn't reflect population health and care needs and will not improve outcomes. Data from the West Midlands internship programme highlights a lack of applications and success from clinicians from ethnic minorities, underrepresented professions and those from underrepresented settings in research. This new **FUNDED** Mentorship and Leadership Programme for aspiring clinical academics* in the West Midlands will cover:

- **Research skills:** Application writing, developing research question, understanding research landscape and funding
- **Leadership skills:** Leadership development; narrative coaching
- **Mentorship:** Mentor for duration of programme
- **Grant payment** to fund 15 days from clinical practice
- **Independent study time**

The programme will be 6 taught sessions between October 2023 and June 2024. The other days can be flexible depending on participants needs.

For further information and application form contact us at clinicalacademics@uhb.nhs.uk

Deadline: Midday 20th July 2023

Interviews: 27th and 28th July 2023

*Eligible if you are a healthcare professional in a **West Midlands NHS setting** (excluding Drs and Dentists) [HEE/NIHR ICA Programme approved regulatory bodies | NIHR](#)
