

School of Health, Science and Wellbeing

The Care and Management of Asthma and C.O.P.D

Level 6 and 7

The Care and Management of Respiratory Disorders

WHO IS THIS MODULE FOR?

The module is intended for qualified health professionals working with patients in general practices, the wider community, and hospital or long-term residential care environments and paramedics.

WHAT YOU WILL ACHIEVE

This module enables you to develop knowledge, understanding and management of COPD and Asthma and is delivered by a wide multi-disciplinary team to give a holistic approach to care.

MODULE DETAIL

This module is designed for practitioners who work in either acute or community care setting and will enable students to gain the knowledge and skills to manage patients with COPD, and asthma and differentiate between the two conditions.

SPECIAL ENTRY REQUIREMENTS

Access to a client group with COPD and/or Asthma and a registrant.
