Job overview

Job summary

Salaried GP - Donnington Medical Centre. We are a forward thinking and adaptive General Practice who are seeking to grow our clinical team. We look forward to receiving applications from GPs who are interested in undertaking 4 to 8 sessions as a Salaried GP in an environment where we have adapted to new ways of working; embracing recent changes that have proved successful for the management of patients through the pandemic, whilst at the same time providing traditional aspects of general practice for those patients who desire/benefit from that approach.

We have a diverse workforce of GPs, nurses, ANPs and ACPs, and recognise the value provided by the team, where care is given with GP support and oversight.

Clinical workload is well managed underpinned by sustainable models.

Serving a population of circa 14,700 patients in a very accessible area of North Telford, we are an established and young, cohesive training practice,

providing effective and comprehensive doctoring, whilst embracing innovative ways of working. We value personal and professional development and encourage you to reach your full potential. Consequently, we welcome all stages of experience and are fully supportive of the Fellowship Scheme and your professional development.

Main duties of the job

Main duties of the job

About you:

- Looking to work 4-8 sessions per week
- A desire to work as part of a supportive and enthusiastic team of healthcare professionals
- A willingness to participate in GP meetings and take an interest in the development of the practice

We are interested in applicants at any stage of their GP career, including straight from VTS training. We provide mentoring and support to new GPs, and also F2s and Medical students and have the experience to provide this. There are also opportunities to develop areas of specialist interest.
